# JAMM JOURNAL

INCA COMMUNITY SERVICES, INC.

## WE ARE MORE THAN JUST DRIVERS!

Johnston County Nature Festival was a huge success in Tishomingo. The Wildlife Refugee Center hosts a festival each year to bring students out to the area so they can see the wildlife. They have lots of animals on display from snapping turtles to huge birds. This event includes a lot of walking in the park so JAMM Transit was there to help transport the students up and down the hill when needed. We support our communities and all the endeavors provided by various organizations!

Making a difference one ride at a time.

### DRIVING IN HEAVY RAIN

**Take your time-** Slow down to help avoid hydroplaning. Rain can cause oils on the roadway to rise to the surface and make conditions slick. Waiting for the rain to let up, instead of rushing to your destinations is safer.

**Give other vehicles more space.** Add 1-2 extra seconds of following time in the rain, which gives you, and the cars behind you more time to react to traffic.

**Turn your lights on.** Turning on your headlights can help you to see more clearly and also helps other vehicles see you.

**DO NOT** use cruise control. On rain, or snow, slick surfaces, cruise control may cause you to lose control. You might think it will help you to stay at one steady speed, but if you hydroplane while you are in cruise control, your car will actually go faster.

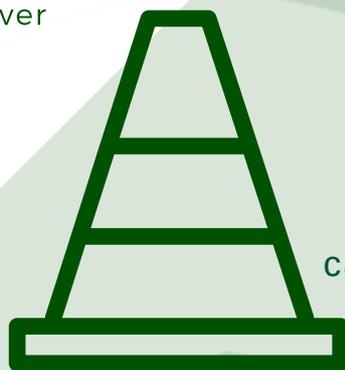

## JAMM'N Success Story

A sweet elderly gentleman who is 82 in Marshall County started riding the bus using the SODA non-emergency transportation grant. He has an eye disease that is causing him to slowly lose his sight. He goes monthly to OKC to get injections in his eyes to help prevent blindness. Before finding JAMM he was going up a day early to stay in a motel and then drive back the next day to keep his eye strain to a minimum. This was an added expense that was becoming unaffordable. Because of SODA he not only is saving money but it's also saving him undue stress. He is a very grateful man and has been very appreciative.

### CAMERA SURVEILLANCE

Bus surveillance is a necessity in today's world, and monitoring on board activity helps promote and help maintain a safer environment for everyone on board. Mobile camera are strategically installed to optimize every angle, ensuring all on-board activity is captured.

### WINDSHIELD WIPERS

If the rubber edge on your blades are torn, the wiper will not make proper contact with the windshield. Causing streaks on the windshield.
